

SURECURE BY PRODUCTS ENGINEERING

"KNOW YOUR STRENGTHS"
Mini Curing Control System

COMPUTER CONTROL FOR THE LOWEST PRICE YET!

The SURE CURE Mini Curing Control System provides computer control for almost half the price of the SURE CURE Micro Curing Control System. It can be added onto any other SURE CURE Curing Control Systems.

BENEFITS

- Controls bed heat.
- Provides curing data: temperature records, maturity values, etc.
- Eliminates the need for temperature recorders and data loggers.
- Controls SURE CURE cylinder mold heat to follow product temperatures.
- Saves materials, time, energy, and MONEY!
- Can be moved and added onto other SURE CURE Curing Systems easily.
- Centralizes cylinder molds.

FEATURES

- Monitors and controls SURE CURE Curing Systems and boiler type curing systems.
- Monitors and controls SURE CURE Cylinder Molds.
- Provides programmable temperature control.
- Stores all data on a computer hard drive.
- Calculates maturity values.
- Operates SURE CURE Hydration Chambers for R&D.
- Indicates elapsed "time on" for controllable channels.
- Prints data records.

WIRELESS

Our SURE CURE Wireless Curing Monitors can be easily added to monitor temperatures from over half a mile away. See our Wireless Curing Monitor brochure for more information.

Products Engineering, Inc.
30735 Bryant Dr., Unit 606
