

# **S SURECURE** **BY PRODUCTS ENGINEERING**

**“KNOW YOUR STRENGTHS”**  
**WIRELESS Curing Monitor**

**MONITOR TEMPERATURES  
OVER HALF A MILE AWAY  
WITHOUT RUNNING  
THERMOCOUPLE WIRE!**

---

## **BENEFITS**

---

- Can be located over half a mile away.
- Provides curing data: temperature records, maturity values, etc.
- Eliminates the need for temperature recorders, data loggers, and long thermocouple wire pulls.
- Can be customized to operate of batteries.
- Saves materials, time, energy, and MONEY!
- Can be moved and added onto other SURE CURE Curing Systems easily.

---

## **COMPONENTS**

---

- I/O cabinet with 6 temperature inputs on 8" thermocouple wire leads.
- 8' power cord with straight blade plug.
- SURE CURE software.
- Personal computer with printer and serial cable (optional).

---

## **FEATURES**

---

- Monitors product temperatures.
- Stores all data on a computer hard drive.
- Can be customizable to better fit customers needs.
- The Mini Curing Controller can be fitted with wireless capabilities to operate SURE CURE Cylinder molds from a distance from the computer.
- Powered by 120 VAC.
- Can be battery powered (Optional).

---

## **WIRELESS**

---

Our SURE CURE Wireless Monitors can be easily added to eliminate the need for long wire pulls. Temperature monitoring can be done from over half a mile away eliminating the need for long thermocouple wire pulls.

## **PRICES**

---

### **Wireless Curing Monitor System**

Wireless Curing Monitor System and software only - \$3,475.00  
With a technical support agreement - \$1,815 + \$42 per month

Additional Wireless Monitors - \$2,075

With a technical support agreement - \$1,220 + \$21 per month

**If Products Engineering supplies the computer -**  
Add \$1,200.00 to the system
